

AFRICA MOUNTAINS

Featuring 84** summits in Africa with prominence of 1,500 meters (4,921 ft.) or greater

Map accompanies a complete listing of mountains available at <http://www.peaklist.org/lists.html>.

Names are generally truncated versions of specific summit names that can be found on the list.

Prominence is the elevation of a summit above the lowest contour that encircles it and no higher summit.

BOLD TYPE	3,000 meter and greater prominence
Large Type	2,000-2,999 meter prominence
Small Type	1,500-1,999 meter prominence

**Note: Map does not show the two African summits in Cabo Verde. Map does not show ultra-prominences in Canary Islands, Europe and Asia.
